

Underground Parking Guidelines

Please enter on East Mifflin Street, punch in the code and pull into the garage. Please enter only one vehicle at a time. As a reminder, the code changes on a quarterly basis, January, April, July and October. The code is available in the office several weeks before the first of each month.

All vehicles must be parked in a marked parking stall, no cars are allowed in fire lanes or random areas. All residents can park in any part of the garage, under Butler Plaza or Arkadia, it does not matter which building you live in.

If you return very late at night and there is not a parking spot available, there are two overflow spots located on Level B, and three more on Level A. Use the two on Level B first and then Level A if necessary. You may park in these spaces when necessary but only when no other stall is available. The code for Level A is #1245. That code will not change. Please make every effort to move your vehicle by 10:00 AM the following morning from the overflow spots.

We appreciate everyone's cooperation with following these guidelines to make the parking useable for all residents. Please do not let guests or unauthorized cars park in the garage. We make every effort to ticket regularly to insure unauthorized vehicles do not take up resident stalls, although there are times when illegal vehicles are present.

If you have a motorcycle or moped, please have it registered with the office and we will assign you a stall to park in. Do not park motorcycles or mopeds in a parking spot meant for a car at any time. Unregistered mopeds or motorcycles will not be allowed.
